

EnvisionGateway 10/100 BaseT Gateway

Multipurpose Ethernet connection

EnvisionGateway provides a multipurpose Ethernet connection to a Philips lighting control system. It supports access to both the home or office lighting via a dedicated Philips app as well as providing a web interface delivering access to the inbuilt timeclock and schedule editor functions. It provides bridging functionality between Ethernet backbone and the DyNet fieldbus devices.

- Large storage capacity — The device stores large project files internally, which apps use to autoconfigure their settings. This saves configuration time and ensures accuracy for phone and tablet control.
- Inbuilt web server — Allows the user to check system settings via the Network Hardware Checker and System Roll Call tools.
- No technical skills needed — Inbuilt timeclock and schedule manager allow the user to manage operation and task scheduling without advanced technical knowledge.
- Powerful custom task engine — Allows users or third-party systems to run macros, such as 'After Hours', 'Shut Down', 'Welcome' and more.
- Advanced interoperability — Supports management of Philips Dynalite and LightMaster-IP fittings on a single system.
